BODUM® Collection 2018

bodum®

MAKE TASTE,
NOT WASTE.

THE BODUM WAY

One of the biggest news in 2018 goes back to the beginning of BODUM's history. The Mocca Siphon Coffee Maker was BODUM's very first product, introduced by Peter Bodum in 1956. We're now proud to present e.MOCCA - an updated version of the original – as part of our line of syphon coffee makers. The manual PEBO has been part of our collection for decades and in 2017 we introduced ePEBO. Over the last few years consumer interest has grown and knowledge about slow coffee has increased and the siphon brewing method, in particular, has been acknowledged for making the best cup of coffee in blind tests. Last but not least, the siphon is highly valued for its entertaining and eye-catching brewing.

NEW DOUBLE WALL GLASSES

We have recently invented a new technique for the production of our double wall glasses by using Tritan. Patent Applications for the new technique are pending. This unbreakable material keeps cold drinks cold and hot drinks hot for a long time. The glasses are produced in one whole piece - no welding and no possibility of leaking – and even better than that, it is all done in a sustainable way. We will also design and produce new travel mugs in tritan.

NEW EXPANSION OF OUR CORK LINE

Cork is one of our favorite materials because of its sustainability, function and design. In our new collections you will find cork used for new French Press coffee makers, new tea pots and new travel mugs produced in tritan, just like our PAVINA® glasses.

ALL GOOD NEWS COMES FROM OUR OWN FACTORY

In the year 2018, we will also see the introduction of a new range of electrical products. Plus, most of our designs, all our metal, cork and plastics are produced at our own production facilities in Portugal by our wonderful Portuguese team.

Enjoy!

ABOUT GOOD DESIGN

← Coffee demonstration, 1958

This question requires that someone does indeed know and dares to define what good design is and show examples. The problem for the designer and producer would then be approach the concept of “good design” with his products.

At BODUM’s design studio we are not trying to fulfill this concept of good design. Instead we want to give from our perspective of a living and contradictory world, where Mickey Mouse is as important as the collected work of Picasso, where the question what is genuine and false, attractive and ugly, harmonious and discordant, right and wrong, cannot be answered clearly.

Thus BODUM Design is not uniform since the inspiration for the shapes and proportions of our products can as easily be from Pythagoras as from certain harmonies in McCartney’s compositions or to make a giant leap from Elizabeth Arden’s lipstick.

“To see a world in a grain of sand and heaven in a wild flower...”

— William Blake

ABOUT BODUM PORTUGUESA

← BODUM Portuguesa's team

BODUM AG is responsible for the manufacturing and distribution of BODUM® products world-wide. BODUM AG ensures that all BODUM® products meet the highest standards and that only state-of-the-art products find their way into the market. More and more BODUM® products are produced for and on behalf of BODUM AG by BODUM Portuguesa.

Since the beginning of BODUM Portuguesa, environment has been a driving force and a major concern in our activity. During almost 30 years of production, BODUM Portuguesa assumed a responsible position towards the surrounding environment but also to the internal working conditions and safety and well-being of the team.

By having production processes that are majorly focused in transforming metal and applying surface treatments to metals, a lot of “environment unfriendly” unitary processes are used and required such as stamping or welding, but the most concerning are those connected to the plating line and degreasing processes.

These production processes consume natural resources, BODUM works to minimize the impacts in:

- Emission of greenhouse gases;
- Emission of other pollutant air streams;
- Emission of pollutants in water;
- Emission of pollutants in soils;
- Risk of industrial accidents;
- Team safety, health and well-being.

This was done by adopting the best available techniques (BAT) as preventive at the source of the pollution emission:

- Training to team in operating, control and contain processes;
- Reducing the number or quantity of hazardous and dangerous materials;
- Equipment and process good-keeping by internal maintenance procedures;
- Optimization of operational conditions and control of processes;
- Reduction of re-processing needs;
- Project and built processes and facilities prevent and contain pollution in its source;
- Good storage of materials to prevent accidents with environmental impact;
- Good storage of materials and production parts to prevent its deterioration;
- Installing containment tanks and isolated floors in risk areas;
- Saving energy in power sources and make the processes energy efficient;.
- Introduction of thermal isolation in the whole building and process tank walls to avoid heat loss;
- Isolation of equipments to avoid the noise propagation.

• Saving water

- Recycling water – only 20% of the total consume is fresh water;
- Consume control by introducing automatic valves and volume controllers;

- Reducing drag-outs and introduce cascade rinsing between processes;
- Extend the liquid baths life and processes to prevent the treatment need by using filtration, evaporation, ionic exchange techniques;

Because it is impossible to contain all pollutant in its sources, BODUM Portuguesa has installed end processes to treat, reduce or eliminate the pollution charge in its effluents and wastes. On these, we can highlight:

• Waste Water Treatment Plant

- All liquid effluents are separated according to their characteristics and treated as in batches;
- All pre-treatments and final treatments are permanently monitored until the admissible values of discharge are achieved;
- The discharge of BODUM lines are connected to a municipal waste water treatment plant that complements the final treatment;
- The sludge generated in the water treatment are de-watered by using recycled air of the pressed air equipments.

• Waste Classification and Separation

- All wastes generated in the plant are submitted to a proper separation, classification, handling and storage until there are sent to the destination;
- All waste management is outsourced to licensed entities, meaning the proper destination has as priority the recyclability of the wastes. Only two of the wastes generated at BODUM must be eliminated because the recycling limitations in the market.

• Air Aspiration System

- The air aspiration system is connected to all the pollution sources avoiding the pollutants spread inside the plant;
- These systems filter the air before its release to the atmosphere;
- In the plating line, besides the filtration, all the air is washed with water in scrubbers.

In 2008, BODUM Portuguesa had its recognition for all the efforts made and processes developed and implemented along the last decades, by having the Environmental Permit¹ issued by the Portuguese Environment Ministry.

1. The permit is mandatory and directly comes from the EC Directive 2008/1/ EC of January 15 (IPPC). According to this permit, BODUM must have a permanent monitoring of the environmental indicators and values so; it is the guarantee of the legislation fulfilling, good practices and procedures.

ABOUT COFFEE

← Columbia Coffee Maker

BODUM was founded in 1944 by Peter Bodum. Launching a new business during the war wasn't easy, and jobs were scarce, but my father sensed it was time to venture out on his own. He was incredibly fortunate to be granted an import license, and by the late 1940s he had achieved great success. As he looked to grow the business, he found new interest in coffee makers. The company's first vacuum/siphon coffee maker, MOCCA, was introduced in the early fifties, but it wasn't until 1958 with the production of the PEBO vacuum/siphon Coffee Maker that BODUM® became a household name for quality coffee products, and coffee has been the major product group for BODUM ever since.

In the 1970s we introduced the now iconic French Press, which continues to be BODUM's most popular item. Today, the majority of BODUM® Coffee Makers are produced at our factory in Portugal, where producing the highest quality products as well as environmental responsibility and safe working conditions are of the utmost importance.

— Jørgen Bodum

FRENCH PRESS

The French Press Coffee Maker is the simplest of all brewing systems, where coarsely ground beans meet hot water right off the boil. The right temperature (92–96°C, 195–205°F) brings the optimal extraction power for the essential oils in the beans to develop their full flavor profile in just four minutes. An easy press on the plunger locks the grinds at the bottom of the glass carafe and stops the brewing process.

Note: For the French Press brewing method, BODUM recommends a coarse grind.

↓ CHAMBORD® Coffee Maker

VACUUM/SIPHON

The vacuum/siphon brew method has fascinated generations of coffee drinkers with its theatrical technique. Water heats in the lower chamber, creating vapor pressure that forces the boiling water up to mix with coffee grounds. The coffee maker is then removed from the heat and vacuum/siphon pressure draws the brewed coffee downward through a strainer, and into the bottom chamber for serving.

Note: For the PEBO® vacuum/siphon brewing method, BODUM recommends a filter coarse grind.

↓ PEBO® Vacuum/siphon Coffee Maker

POUR OVER

The pour over brew method features a fine mesh stainless steel filter that eliminates need for paper filters. Paper filters actually absorb the coffee's essential oils hence robbing coffee of true flavor, plus no paper filter means no waste!

Note: For the pour over brewing method, BODUM recommends a filter coarse grind.

↓ POUR OVER Coffee Maker

COLD BREW

Quality cold brewed coffee can be made using essentially the same steps. Instead of hot water, add filtered water at room temperature and stir. Place the lid on the carafe and let brew for 12 -24 hours at room temperature or in your refrigerator. Press and enjoy!

Note: For the French Press brewing method, BODUM recommends a coarse grind.

↓ COLD BREW Coffee Maker

MAKE TASTE, NOT WASTE.

The BODUM® COLUMBIA Coffee Makers are made of double wall stainless steel which means that your coffee stays hot much longer. The air in between the two walls provides a highly effective layer of insulation. The COLUMBIA is not just any nice looking coffee pot: It is a coffee press. After all, you would not want to compromise taste for beauty. And it works just like any of our coffee presses.

ABOUT TEA

← ASSAM Tea Press

No wonder tea has been the most popular drink after water for centuries. Black teas, white teas, green teas, herbal teas, fruit teas, rooibos teas – the options for pleasure and delight are simply limitless. We have the right tea maker for all of your tea preferences, including iced tea. Tea brewing doesn't get any purer than with the BODUM® Tea Presses. With this unique system your tea is brewed precisely to your desired strength and aroma. We developed the Tea Press in collaboration with the English Tea Council over 30 years ago and we've been perfecting it ever since. BODUM® Tea Presses are made of the highest quality borosilicate glass – a material that doesn't stain and is absolutely neutral in taste. The glass allows you to observe the brewing process and stop it when it's exactly right. It's just fascinating to see all the beautiful tea colors come to life. The BODUM® Tea Presses are as much a pleasure for your eyes as they are for your taste buds.

TEA PRESS

The Tea Press utilizes the same brewing system as the French Press to allow for full control of the tea steeping process. Once your preferred coloring and strength is reached, you simply press down the plunger and seal the tea leaves into the bottom part of the filter that has no holes. This makes the brewing process stop with one easy push and you can discard or re-use the tea leaves after you have enjoyed your beverage. Silicone rim secures filter firmly into the teapot and stays cool to the touch for safe removal.

Note: All loose leaf teas are suitable for the BODUM® Tea Press. The Tea Press works best with fruit teas and black tea because it interrupts the brewing process – avoiding bitterness.

↓ ASSAM Tea Press

TEAPOT AND TEA INFUSER

Tea leaves can be left to swirl freely in the infuser to develop their full flavor, and can be left to brew without interruption. The filter, along with the tea leaves, can be removed at any time to stop the brewing process and can even be used a second time to re-infuse quality loose leaf tea. The highest quality green tea, for example, can be reused up to four times. The CHAMBORD® Teapot comes with a wide filter basket in the borosilicate glass bowl which lets the tea leaves swirl freely and gives them the space they need to live up to their full aroma potential.

↓ CHAMBORD® CLASSIC Teapot

MAKE TASTE, NOT WASTE.

The CHAMBORD® Teapot comes with a wide filter basket in the borosilicate glass bowl which lets the tea leaves swirl freely and gives them the space they need to live up to their full aroma potential. Whether you prefer black or green teas – the CHAMBORD® serves them all perfectly; giving them the stage they deserve and displaying their unique coloring beautifully.

ABOUT CORK

← YOHKI Storage Jars

BODUM has a new design line with cork. One of nature's most beautiful and functional materials. Cork comes from the bark of cork oak that is a bit of a miracle in itself. Each 9 years you can harvest all the tree's bark so that it is completely naked. Without damage. The tree generates new bark and can grow up to 200-300 years old. Cork oak grows in the Mediterranean region, not least in Portugal, which supplies about half of all the cork that is used in the world. We know the cork from wine bottles plugs, but because cork has so many good qualities, it also moved into the home. Cork is thermal insulation, water and air-tight, elastic, light and soundproofing. And it is beautiful to look at and smooth to touch. Cork is a 100% natural and sustainable material. And we have almost the cork-trees standing just outside the windows. All BODUM products are produced namely in our own factory in Portugal, where environmental responsibility already has the highest priority.

ABOUT DRINKWARE

← BISTRO Double wall glasses

BODUM premiered its line of double wall glasses in 2004. The inventive design coupled with timeliness style made these glasses an instant classic. Over the past years, the collection has earned numerous awards and expanded to include a variety of styles and sizes. Made of heat-resistant borosilicate glass, and individually mouth-blown by expert artisans, the double wall construction creates a highly effective layer of insulation. Hot drinks stay hot longer, while the glass remains cool to the touch, and cold drinks stay cold without producing messy condensation. The result is endless serving possibilities. The patent pending hydrophobic silicone vent at the bottom of each glass equalizes pressure within the walls of the glass with the outside air pressure. The glass will self-adjust to any temperature liquid, and the vent is only permeable to air, not water, so whether your beverage is hot or cold it will never allow fluids into the interior of the glass layers.

The BODUM® Double Wall Glasses have won the following awards:

Microwave safe
Up to 350°F/180°C.

Oven safe
Up to 350°F/180°C.

Dishwasher safe
Do not place glasses into a crowded dishwasher.

USE & CARE

Every double wall glass is mouth-blown by expert artisans, and therefore each may have slight differences in height, thickness, and weight. To preserve the longevity of the glass, please adhere to the following precautions:

ABOUT KITCHEN

← HOT POT SET Bowl

Our kitchens have become the central hub of our living quarters – almost like the farm kitchens in Denmark used to be, the country where BODUM was founded. The kitchen of today is a living room, it's where everybody ends up anyway. It's where discussions are held and beans are spilled.

ABOUT E-BODUM®

← BISTRO Burr Coffee Grinder

e-BODUM® inspires you to build a collection of power tools that reflect our core principle: Good design has to be functional and affordable. Once you see past the good looks of e-BODUM®, each products attributes and performance will make you a loyal fan! Not only will you appreciate the award winning design of these products, e-BODUM® will bring the power and innovation necessary to make kitchen duty a breeze!

STAND MIXER

The Stand Mixer effortlessly takes care of blending, mixing, and kneading your dough as well as whipping cream and beating egg whites.

Whisk

Dough hook

Beater

BISTRO
STAND MIXER

11381-01-3

Capacity 4.7l, 5Qt, 160oz
Measurements 234×397×343mm
Material plastic, silicone, rubber, stainless steel, non-stick coated cast aluminum, chrome-plated steel
Rating Europe 700W, 220–240V, 50–60Hz
The Stand Mixer comes with the following attachments:
1 Stainless steel mixing bowl
1 Dough hook
1 Beater
1 Whisk

- Powerful 700W, 7 speed motor delivers up to twice the power of traditional stand mixers.
- Rotating attachment head provides orbital movement, maximizing capture surface for thorough mixing.
- Includes 3 attachments: Dough hook, ideal for bread and pizza doughs, rolls and sweet bread dough; Beater for cake batters; Stainless steel whisk for beating egg whites, cream and cocktail sauces. Attachments and mixing bowl are dishwasher safe.
- Lift-assist mixer head locks into place during use with lever for easy release.

BLENDER STICK

This Blender Stick is very convenient and includes 3 stainless steel accessories. Ideal for pureeing, whipping cream and beating egg whites as well as for smoothies and soups.

Measurements 67×67×358mm
Material plastic, stainless steel, silicone
Rating Europe 200W, 220–240V, 50–60Hz
Rounds per minute EU (r/min)
Low speed: approx. 15'000
High speed: approx. 20'000
The Blender Stick comes with the following attachments:
1 Whisk 1 Knife
1 Beater 1 Tool for blades
1 Beaker with lid

- The slim and sleek design is perfect for reaching deep into bowls, pots, and pitchers.
- Includes three stainless steel blades: Beater to whip up cream and egg whites; Whisk to blend mayos and sauces and knife for soups and smoothies.
- Includes a beaker with silicone lid ideal for pureeing and food storage.
- Two push-activated buttons control speed settings for convenient, one-handed use. 15'000 rotations per minute in low speed, 20'000 in high speed make for a powerful kitchen tool.
- No-slip, rubber-coated grip features BODUM's signature ergonomic dots for a secure, comfortable grip.

DOUBLE WALL WATER KETTLE

This BISTRO Water Kettle can be set and held at desired temperature for up to 30 min! Ideal for maintaining optimal brew temperatures for your teas!

Capacity	1.1l, 37oz
Measurements	145×230×260mm
Material	plastic, silicone, borosilicate glass, metal, stainless steel, rubber
Rating Europe	1500W, 220–240V, 50-60Hz

- Five temperature settings perfect for different kinds of teas: 60°C/140°F, 70°C/158°F, 80°C/176°F, 90°C/194°F and boiling.
- The inner glass wall is made of borosilicate glass, the outer one of transparent plastic. It protects the glass, insulates, and keeps you from burning your fingers.
- The water only comes in contact with glass – the process is therefore BPA- Free.
- Mesh-screened spout captures chalk while pouring.
- The transparent container makes it easier to control the water level. The scale line indicates liters, ounces and cups.
- Manual On/Off switch plus temperature sensor for automatic shut off and added safety.
- Keep warm for up to 30 min.

BISTRO
DOUBLE WALL WATER KETTLE

11659-01 1.1l, 37oz

WATER KETTLE

The electric BISTRO Water Kettle was developed to boil water quickly and energy efficiently – ideal for coffee, tea and instant soups.

Capacity	0.5l, 17oz – 1.0l, 34oz – 1.5l, 51oz
Measurements	0.5l: 172×100×195mm 1.0l: 125×200×224mm 1.5l: 148×232×235mm
Material	plastic, stainless steel, silicone
Rating Europe	0.5l: 700W, 220–240V, 50-60Hz 1.0l: 1300W, 220–240V, 50-60Hz 1.5l: 1850W-2200W, 220–240V, 50-60Hz

- The heating element is safely tucked away at the bottom of the kettle and doesn't get in contact with the water.
- The cordless container can be positioned on its 360 degree base and easily remove for cordless pouring.
- The lid opens at the push of a button.
- Mesh-screened spout captures chalk while pouring.
- Easily readable water level scale to avoid wasting water and energy.

 2. 11862-109 1.0l, 34oz

BURR COFFEE GRINDER

Grinder crushes beans between stainless steel conical burrs rather than slicing them which preserves bean's intrinsic flavor and aroma.

Measurements 120x156x275mm
Material plastic, rubber, silicone, borosilicate glass, stainless steel, die-cast aluminium (for 70/73 version)
Rating Europe 160W, 220-240V, 50-60Hz
Rounds per minute (r/min) 720+/-15%

- This space-saving grinder holds an amazing 220gr of coffee and therefore allows for larger quantities in one go.
- 12 settings allow you to grind from a coarse French Press to a fine espresso with the ability to micro-adjust between settings.
- Programmable time function for even easier handling.
- The wide open funnel prevents spilling of the beans.
- Tightly fitting plastic lid keeps the grounds from spilling.
- Equipped with a friction clutch, preventing damage to the grinding gear by the presence of small stones.

BISTRO
BURR COFFEE GRINDER
10903-73-1

BLADE COFFEE GRINDER

Grinds coffee beans from coarse to fine quickly and efficiently with its strong, durable, stainless steel cutting blade.

Measurements 90x95x166mm
Material Plastic, stainless steel, rubber, die-cast aluminium (for 70/73 version)
Rating Europe 150W, 220-240V, 50-60Hz
Rounds per minute (r/min) 26'000+/-20%

- Compact and small – this space efficient coffee grinder can easily be left on the kitchen counter.
- The transparent lid allows you to control the grinding progress – the longer the grind, the finer the grounds.
- The power cord can be tucked away within the grinder.
- Easy, push-button control allows for pulse action or continuous grind.
- Strong, durable stainless steel cutting blade that spins at a precise RPM.
- Convenient cord storage in base.
